# Sleep Naturally

Sumptuous sleep starts with quality materials. That's why our luxury, handcrafted mattresses are made with natural fillings. Each layer is mindfully crafted, with your comfort at the forefront of design.

The feeling of contentment is provided with every Espoir moment. The purity of the materials is the baseline for this, supporting you from dusk until dawn.

Espoir Quality

Your comfort is at the forefront of our design.

# Ortho Natural Collection

Our Ortho Natural Collection has been designed to provide a firmer more supportive sleeping experience - Perfect for those who prefer to sleep on their backs and sides.

Ranging from 1000 to 6000 individual pocket springs complemented with genuine hand side stitching to ensure you can sleep right to the edge of the mattress with no roll off, providing you a supportive restful sleep - night after night .

# Fabric Options

Choose any of the below colour fabrics for your headboard style and bed base.

## Exclusive Collection

Our finest most luxurious fabrics for your headboards and bed bases.

## Premium Collection

A stunning collection of premium complimentary fabrics for headboards and bed bases.

# Bed Care Guide

Thank you for trusting Espoir with your perfect nights sleep. Please take time to read this care guide in order to understand which type of mattress you have purchased and how to look after it.

## Delivery

Always use two people to handle the product. Take care when lifting to avoid personal injury and/or damage to the mattress. Seek assistance to move, turn and rotate the mattress, using the handles to do so, but not for lengthy carrying. After unwrapping your new

mattress, leave it in a well-ventilated room for a few hours. Any natural scent from the fillings will dissipate after a few days.

## Dimensions & Feel

All our mattresses are handcrafted to metric dimensions meaning they will naturally vary a little in size, with a variation of +/- 2cm. During transportation some mattresses may contract, but they will relax to their normal length again after being used for a short while.

Sometimes the mattress will feel firmer than the one's in retail stores. This is totally natural. Your new mattress will eventually settle and become a little softer.

## Tufting

Each and every one of our mattresses have tufts that ensure the upholstery layers remain firmly in place. In the unlikely event of any of your tufts snapping, contact the retailer from whom you purchased

your mattress. They will arrange to have the tuft replaced in your home.

## General Advice

Do not fold or roll your mattress as it could damage it.

Also, avoid jumping on your mattress, as this could damage the springs and the base. Electric blankets can be used

### Mattress protection

- We strongly recommend the use of a good quality cotton or wool-faced mattress protector under your bed linen to protect your mattress from spills and stains and to promote hygiene – avoid plastic non-breathable types or any other form of plastic sheeting

as this will tend to trap condensation and risk potential mould growth.

- Failure to use a mattress protector could invalidate the guarantee.

## General Advice continued...

### Rotating and turning your mattress and topper

- Rotating and turning over the mattress and topper periodically will encourage the upholstery fillings to settle more evenly. Failure to follow the turning instructions will result in excessive dips in the upholstery filling.
- It is necessary for you to rotate and turn (if you have a turnable mattress) your mattress once a week for the first 3 months of use, and thereafter with the seasons.
- No turn and Pillow top mattresses are designed to be single sided so you should turn them from head to foot only.
- No turn mattresses – Simply rotate your mattress end-to-end once a week during the first 3 months and thereafter with the seasons.
- Pillow Top Mattresses – Rotate your mattress end-to-end once a week during the first 3 months and thereafter with the seasons. The nature of the pillow top design means the mattress surface will have deeper body impressions as the mattress settles, this is expected and will not affect your comfort.
- Zipped mattresses – In the case of zip and linked beds please unfasten the mattress before rotating and turning.
- Handling your mattress – Never attempt to fold or roll your mattress, even for a short period of time. Your mattress is designed and constructed for use only in a flat position. Please ensure when transporting or storing a mattress it remains in a flat position.
- Warning – You should not attempt to turn or rotate the mattress by yourself. We recommend that you seek assistance. Apart from the risk of potential injury to yourself, you also risk damaging the pocket springs should you bend or roll the mattress. This would invalidate the guarantee.
- Warning – Do not use the handles to lift or carry the mattress. The sewn on handles are intended to help rotate and position the mattress while lying flat on the divan base. Handles sewn to a mattress are not designed to support the full weight of the mattress and you would risk damaging the border upholstery. This would invalidate the guarantee.

### Turning instructions for a double sided, seasonal turn mattress

**Seasonal turn 1**  
Turn the mattress over 180°

**Seasonal turn 2**  
Rotate the mattress through 180°

**Seasonal turn 3**  
Turn the mattress over 180°

**Seasonal turn 4**  
Rotate the mattress through 180°

Repeat the above turning steps for seasons thereafter.

## Expect body impressions

- Most people tend to sleep in the same position on their mattress every night. Body impressions are therefore a normal and natural occurrence in your mattress and a positive indication that the generous amount of comfort fillings used in mattresses are conforming to your body's unique shape, weight and sleeping pattern.
- These comfort fillings will settle and dip in the area where you sleep, which can sometimes leave a ridge in the centre of the mattress (which may be more noticeable in larger mattresses), but which does not impact the comfort or support of the mattress.
- Your mattress must be rotated and turned as indicated to minimise body impressions.

## Airing your mattress and topper

- It is important to let your mattress breathe to allow body moisture to dissipate.
- Air your mattress on a weekly basis – simply leave the bed linen turned back for a few hours each time to allow air to circulate around and through the mattress.

## Cleaning your mattress

- Clean your mattress every other month with a soft brush to keep it clear of dust and fluff – do not use a vacuum cleaner as this will unduly disturb the upholstery fillings.
- Treat spills and stains immediately using dry towels or paper towels.
- Do not use detergents or chemical cleaners as this may bleach or damage the fabric.

## Mattress usage

- To maximise the consistent shape and support around the perimeter of your mattress please do not sit on the edge of the mattress.
- Please do not stand on your bed or allow children to treat it as a trampoline – this applies equally to the mattress and the divan base.
- Do not remove any sewn-in labels – these contain care, quality and content details vital to the guarantee.

## Use a suitable supportive base

- If your mattress is intended for use on a different base, other than the same base tried in store, then the level of final comfort and support could vary.
- We recommend that you do not use a new mattress with an old divan base or an old bedstead, which incorporate a sprung-system (either metal springs or sprung slats). An imperfect base, with a worn and tired sprung-system, will provide a reduced level of support and could result in premature mattress wear and invalidate the guarantee.
- Where a bedstead with a slat system is being used, ensure that the slats are not more than 7.5cm (3 inches) apart. If a wider gap exists between the slats, it is recommended that a 'bedstead mattress base' be used between the slat system and mattress. Failure to take such action may result in premature wear on the mattress.

## Divan Base

- Your divan base may have drawers – these drawers have been designed to accommodate lightweight items only, such as pillows, bed linen or clothing. Please do not overload the drawers, as excessive weight can result in damage to the runners and may cause the drawers to jam. We recommend a maximum weight of 20kg per standard drawer or 7kg per continental drawer.
- From time to time, you should also check that all screws for castors, feet, linking bars and the headboard are secure to avoid undue strain on the divan base.
- We recommend the use of castor cups for beds on wooden floors.

# Fitting

## Fitting the divan base together

Position the two divan halves where they will connect, ensuring that the smooth side of the connectors are facing each other.

Stand to one side of the bed, lift the right hand base approx 100mm, while holding the left hand base in position.

Then, squeeze the divan halves together and lower the right hand base ensuring the connectors locate. Repeat on the other side.

## Fitting the glide and castor

Push the glide or castor into the corner sockets of the bed and gently tap with a rubber mallet until it is fully locked in. Do not use a metal hammer or object as this may damage the castors or divan base.

# Guarantee

To give you further peace of mind, your mattress comes with a 1 year guarantee and a 4 year warranty, and your divan and headboard come with a 1 year guarantee, from the date of purchase.

In the unlikely event that a defect arises through proven material failure or faulty workmanship then simply contact your retailer. We guarantee to make good or replace the mattress, topper or divan bases in question on the following basis:

### The following conditions apply to the guarantee:

- This guarantee applies only to goods purchased from an authorised retailer.
- Any claim must be submitted in writing by the original purchaser to the supplying retailer within one month of the apparent defect becoming evident.
- Under the law, the Contract of Sale exists between the retailer and the consumer. Consequently, any claims made under this guarantee must be made through the retailer from whom the bed was purchased. If your retailer is no longer in business, then please contact [info@infinitysprings.co.uk](mailto:info@infinitysprings.co.uk)
- The claim must be supported by proof of purchase – original invoice or sales receipt.
- In the event of a dispute, we may request a third party inspection of the products by a recognised and qualified organisation before agreeing to carry out repairs/replacements.
- If the product in question has been discontinued and cannot be repaired, then we reserve the right to supply an equivalent alternative.
- The guarantee and warranty does not apply if our Bed Care Guide has not been followed; where there is evidence of inappropriate use or abuse of the product; if the products are soiled or are unhygienic; where a mattress has been used with an unsuitable base.
- Following a repair, the guarantee will remain valid from the date of the original purchase.
- This guarantee is not transferable.
- The terms of this guarantee are governed by English Law.
- The guarantee does not affect your statutory rights.
